THE METALLICA

The elements of great design are analysed, balanced and fused together to create fence and gate architecture that meets the essential equation of style, security and safety.

THE METALLICA GATE DESIGNS

STYLE + VERSATILITY + DURABILITY

Closely spaced wire lets air flow through and allows visibility. FenceLab 358 mesh has double vertical wires making it stronger and more rigid than other brands. It is hot dip galvanised after welding to maximise corrosion performance. Typical applications include the fencing off of services or anywhere that anti-scale is a requirement.

A wide range of industry specific custom gate designs are available and can be made to order to suit your application

Type

Width

Pedestrian Gate

< 1.2m

Swing Gate

< 4m Leaf

Sliding Gate

< 12m Opening

Cantilever Gate

< 12m Opening

TECHNICAL SPECIFICATIONS

- **Horizontal** : Single 4.0mm wire with 72mm spacing
- **Vertical** : Double 4.0mm wire with 8.7mm spacing
- Hot dip galvanised after welding

Brackets

Custom design Orbison panels and gates can be made to your specification.
