PERIMETER ARCHITECTURE

THE LENNOX

The elements of great design are analysed, balanced and fused together to create fence and gate architecture that meets the essential equation of style, security and safety.

THE LENNOX

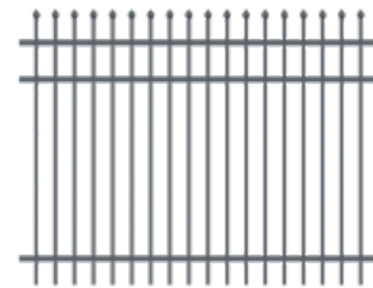

ALUMINIUM COMMERCIAL PANEL

Chunky tubular sections give The Lennox panels their strength making them ideal for school fencing.
Pressed spear tops and chunky tubular sections create a strong deterrent for any perimeter secured by The Lennox Security panels.

1.5mH / 1.8mH Flat Top Panel

1.8mH / 2.1mH Spike Top Panel

The Lennox series of fence panels and gates, made from high-quality aluminium, are designed to withstand the harshest of environments whilst meeting the most discerning architectural tastes. Style meets security with these high stature panels, available in both flat or spear top options, reflecting the demand for secure perimeters in commercial and educational environments. Gates can be custom made to suit swing, sliding or cantilever installations.
